How to Contribute to Open Source

Want to contribute to open source? A guide to making open source contributions, for first-timers and for veterans.

[Table of Contents](#) ▾

https://opensauced.pizza

The image shows a dark-themed website for OpenSauced. The top navigation bar includes the OpenSauced logo, links for Features, Pricing, About, and Blog, and a 'Connect with GitHub' button. The main content area features a large headline: 'YOU GOT THIS Your next open source journey starts here'. Below this is a sub-headline: 'Start the path to your next contribution and join the global community of open source developers making an impact around the world.' Two buttons, 'Get Started' and 'Explore Projects', are positioned below the text. At the bottom, there is a link: 'Maintaining a team? Click here'. On the right side, a screenshot of a user profile for Nicole Davis is shown. The profile includes a bio, location (United States), and a 'Follow' button. Below the bio is a 'Current Interests' section with tags for JavaScript, TypeScript, and GraphQL. A 'Languages' section shows proficiency in JavaScript, Python, and Swift. The main part of the profile screenshot is a 'Highlights' section with a chart showing '5 PRs', '15 PRs', '2 mo', and '7 Repos'. Below the chart is a list of 'Latest PRs' with columns for title, status, and date.

How **did I** get started in Open Source?

Get excited and learn to build the web!

Rails Girls - Get started with tech

Our aim is to give tools and a community for women to understand technology and to build their ideas. We do this by providing a great experience on building things and by making technology more approachable.

Learn sketching, prototyping, basic programming and get introduced to the world of technology. Rails Girls was born in Finland, but is nowadays a global, non-profit volunteer community.

You are welcome to join! [Contact us](#) or [follow us on Twitter](#).

Improving Onboarding

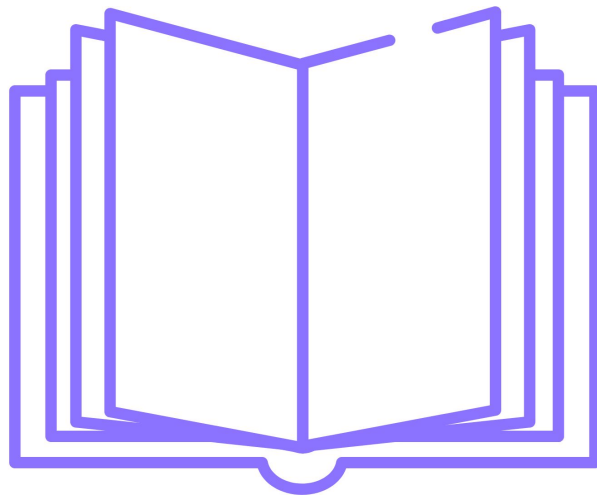

Meeting People

What are some types of non-code contributions?

Documentation

<https://github.com/distributeaid/distributeaid.org/>

Dev Setup

Install system dependencies:

- Node v14
- Yarn v1.22.5

Install project dependencies:

- `yarn`

Run the dev server:

- `yarn dev`

Finally, checkout the local site & GraphQL sandbox at:

- <http://localhost:8000/>
- http://localhost:8000/___graphql

Dev Notes

Crucial Commands

`yarn dev`

Run the project locally with live reload in development mode.

`yarn build`

Run a production build into `./public`. The result is ready to be put on any static hosting you prefer.

Updating data across multiple browser tabs using Vue.js and Vuex

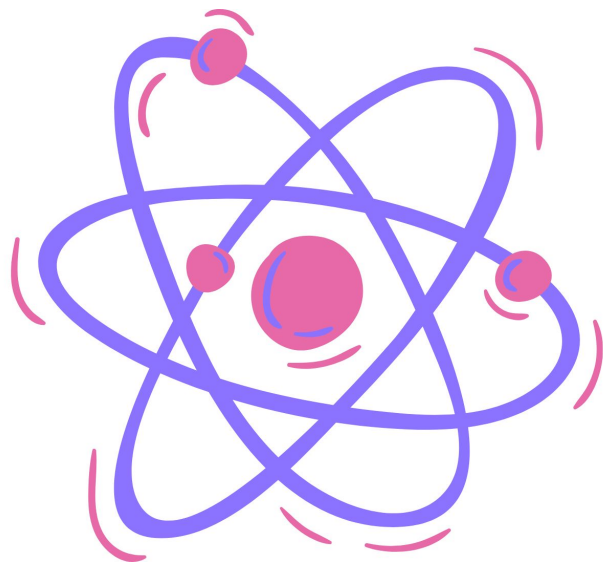

Jan 15, 2020

What a start to the year! Let me set the stage: I'm in the process of building a cash register / point of sale system, which uses [Vue.js](#) and [Vuex](#).

The purpose of the app is to enter food orders and print them to a receipt (a story for another time!)

However, when I deployed a physical unit, one immediate piece of feedback from hungry customers is that they'd like to see the order as the food items are being entered. Woops! Didn't

Trying Stuff Out

```
standard_init_linux.go:228: exec user process caused: no such file or directory
Error: failed to BuildWithToolchain: failed to dockerBuildForDirectory: failed to Run docker com
mand: failed to Run command:
exit status 1
```

The image shows a screenshot of the CodeTriage website landing page. The page has a dark blue background with a horizontal bar at the top containing navigation links: 'About', 'University', 'Log in', and 'Sign Up'. The CodeTriage logo, consisting of three overlapping squares (green, orange, and blue) followed by the text 'CodeTriage', is centered at the top. Below the logo is a large white heading: 'Help out your favorite open source projects and become a better developer while doing it.' Underneath the heading is a paragraph of text: 'Pick your favorite repos to receive a different open issue in your inbox every day. Fix the issue and everybody wins. 72,152 developers are working on 7,731 open source repos using CodeTriage.' A link 'What is CodeTriage?' is provided below the paragraph. At the bottom center, there is a teal button with the text 'SIGN UP WITH GITHUB'.

Answering Questions

<https://stackoverflow.com/a/66971645>

▲ 1 I faced this issue too, but with .net core 2.1. I'm not sure why it's working but, If this solution is available for you then try the following:

1

- ▼
1. Restart Docker Desktop (This solution is offered in the output window)
 2. Change the docker file.

I replaced this

```
FROM mcr.microsoft.com/dotnet/runtime:2.1 AS base
WORKDIR /app
```

```
FROM mcr.microsoft.com/dotnet/sdk:2.1 AS build
WORKDIR /src
```

to

```
FROM mcr.microsoft.com/dotnet/core/runtime:2.1-alpine AS base
WORKDIR /app
```

```
FROM mcr.microsoft.com/dotnet/core/sdk:2.1-alpine AS build
WORKDIR /src
```

Then debug started to work fine even after changing the docker file to start variant, including stops on breakpoints. And my configuration has one additional difference: I use Debug argument in the docker file and use Debug in Solution configuration

```
RUN dotnet build "DebugLinux.csproj" -c Debug -o /app/build
```

Electron Discord Rules

We have a small set of rules on our server, please read them.

Rule 1
Follow the [Discord Community Guidelines](#) and [Terms Of Services](#).

Rule 2
Follow the [Electron OpenJS Foundation Code Of Conduct](#).

Rule 3
Absolutely no hate speech, derogatory language, or abuse of any kind. We have a zero tolerance policy for disrespect towards any individual.

Rule 4
Please be kind! We understand times are tough, but it's no reason to take it out on others. Please keep the Electron Discord a positive, safe space, and treat other community members with respect.

Rule 5
Have a problem? Ask an Admin! Please DM if you ever have issues with other community members, parts of the Discord, or specific questions. We're here to help!

Rule 6
Do not provide or request help on projects that may break laws, breach terms of services, be considered malicious or inappropriate. The moderation team can take action against you without a reason or appeals.

You do not have permission to send messages in this channel.

<https://github.com/jessicarose/open-advice-1-1s>

The screenshot shows the GitHub repository page for `jessicarose/open-advice-1-1s`. The repository is public and has 87 stars, 8 watchers, and 3 forks. The main content area displays a list of files: `README.md` (updated 4 years ago), `calendly1.png`, `calendly2.png`, and `tweet.png` (all added 4 years ago). Below the file list is the `README.md` content, which includes the title `Open-Advice-1-1s` and a paragraph explaining the project's purpose: "I've been running open advice calls for technologists for the past several years, to help offer support to folks wanting advice about working in tech. I'm open sourcing my process and tooling here, in hopes that it will prove useful for anyone hoping to offer advice to people outside their immediate networks. While I've developed this process to use with people seeking advice about working in technology, this could be repurposed to fit the needs of advice seekers from any discipline." The text continues with "The tools I've chosen work well for my workflow, but may not be a great fit for everyone. Feel free to substitute out for your favorite tools with similar functionality".
