Highlights Contributions Requests **Recommendations**

This person: 5 PRs, 15 PRs, 2 mo, 7 Repos

Latest PRs

- fix: limit contribution results to last 30 days #725
- feat: add filtering by repo to recent prs for contributor #91
- fix: pass topic to contributor and commit hooks #578
- refactor: set default font weight to medium and removed all instance in code base #580
- feat: use GitHub API to fetch repo list for onboarding #573
- feat: add filtering by repo to recent prs for contributor #91
- fix: separate topics from repos when running queries #82
- fix: exclude sorting topics when searching by individual repo #82
- fix: pass topic to contributor and commit hooks #578
- fix: simplify logic for filtering repos, reposids, topic #22

Get excited and learn to build the web!

Rails Girls - Get started with tech

Our aim is to give tools and a community for women to understand technology and to build their ideas. We do this by providing a great experience on building things and by making technology more approachable.

Learn sketching, prototyping, basic programming and get introduced to the world of technology. Rails Girls was born in Finland, but is nowadays a global, non-profit volunteer community.

You are welcome to join! [Contact us](#) or [follow us on Twitter](#).

Dev Setup

Install system dependencies:

- Node v14
- Yarn v1.22.5

Install project dependencies:

- `yarn`

Run the dev server:

- `yarn dev`

Finally, checkout the local site & GraphQL sandbox at:

- <http://localhost:8000/>
- http://localhost:8000/___graphql

Dev Notes

Crucial Commands

`yarn dev`

Run the project locally with live reload in development mode.

`yarn build`

Run a production build into `./public`. The result is ready to be put on any static hosting you prefer.

Updating data across multiple browser tabs using Vue.js and Vuex

Jan 15, 2020

In a donar:

What a start to the year! Let me set the stage: I'm in the process of building a cash register / point of sale system, which uses [Vue.js](#) and [Vuex](#).

The purpose of the app is to enter food orders and print them to a receipt (a story for another time!)

However, when I deployed a physical unit, one immediate piece of feedback from hungry customers is that they'd like to see the order as the food items are being entered. Woops! Didn't

Contestar Preguntas

Ir a donar:

<https://stackoverflow.com/a/66971645>

▲ 1 I faced this issue too, but with .net core 2.1. I'm not sure why it's working but, If this solution is available for you then try the following:

1

1. Restart Docker Desktop (This solution is offered in the output window)
2. Change the docker file.

I replaced this

```
FROM mcr.microsoft.com/dotnet/runtime:2.1 AS base
WORKDIR /app
```

```
FROM mcr.microsoft.com/dotnet/sdk:2.1 AS build
WORKDIR /src
```

to

```
FROM mcr.microsoft.com/dotnet/core/runtime:2.1-alpine AS base
WORKDIR /app
```

```
FROM mcr.microsoft.com/dotnet/core/sdk:2.1-alpine AS build
WORKDIR /src
```

Then debug started to work fine even after changing the docker file to start variant, including stops on breakpoints. And my configuration has one additional difference: I use Debug argument in the docker file and use Debug in Solution configuration

```
RUN dotnet build "DebugLinux.csproj" -c Debug -o /app/build
```

Electron Discord Rules

We have a small set of rules on our server, please read them.

Rule 1

Follow the [Discord Community Guidelines](#) and [Terms Of Services](#).

Rule 2

Follow the [Electron OpenJS Foundation Code Of Conduct](#).

Rule 3

Absolutely no hate speech, derogatory language, or abuse of any kind. We have a zero tolerance policy for disrespect towards any individual.

Rule 4

Please be kind! We understand times are tough, but it's no reason to take it out on others. Please keep the Electron Discord a positive, safe space, and treat other community members with respect.

Rule 5

Have a problem? Ask an Admin! Please DM if you ever have issues with other community members, parts of the Discord, or specific questions. We're here to help!

Rule 6

Do not provide or request help on projects that may break laws, breach terms of services, be considered malicious or inappropriate. The moderation team can take action against you without a reason or appeals.

Ir a donar:

https://github.com/jessicarose/open-advice-1-1s

The screenshot shows the GitHub interface for the repository 'jessicarose/open-advice-1-1s'. At the top, there's a navigation bar with 'Pull requests', 'Issues', 'Codespaces', 'Marketplace', and 'Explore'. Below that, the repository name is displayed with 'Public' status and statistics: 8 watches, 3 forks, and 87 stars. The main content area shows a file list with 'README.md', 'calendly1.png', 'calendly2.png', and 'tweet.png'. The 'README.md' file is selected, showing the title 'Open-Advice-1-1s' and the introductory text: 'I've been running open advice calls for technologists for the past several years, to help offer support to folks wanting advice about working in tech. I'm open sourcing my process and tooling here, in hopes that it will prove useful for anyone hoping to offer advice to people outside their immediate networks. While I've developed this process to use with people seeking advice about working in technology, this could be repurposed to fit the needs of advice seekers from any discipline. The tools I've chosen work well for my workflow, but may not be a great fit for everyone. Feel free to substitute out for your favorite tools with similar functionality.'

OPEN SOURCE EXPLORERS

DISTRIBUTE AID
OPEN SOURCE EXPLORERS

What is Open Source Explorers

Open Source Explorers is [Distribute Aid's](#) open source outreach program. It uses contributions to Distribute Aid's projects as a well-structured and impactful introduction to open source. The program is aimed at developers, designers, and other types of contributors. It lasts 3 months, is part-time, and a volunteer engagement.

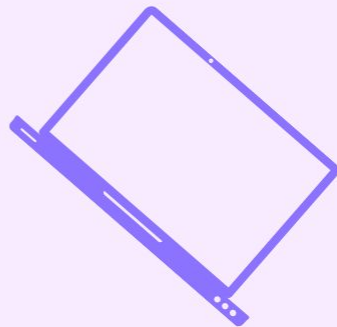

Program participants will be paired with mentors and collaborate with each other in teams and with existing Distribute Aid team members.
